Education

University of Engineering and Technology, Lahore

Bachelor of Science in Computer Science

Nov. 2021 – May 2025

Lahore, Pakistan

Relevant Coursework

- Data Structures and Algorithms
- Software Engineering
- Design Patterns
- Database Management Systems
- Artificial Intelligence
- Enterprise Application Development
- Object Oriented Programming
- Computer Networks
- Theory of Automata

Experience

Havenier Solutions

Mobile Application Developer Intern

September 2024 – October 2024

Lahore, Pakistan

- Developed a mobile app to manage expenses between individuals and groups, reducing manual tracking time by 70% using automated calculations and summaries.
- Implemented Clean Architecture principles, improving code maintainability and reducing debugging time by 40%.
- Achieved 90% test coverage by writing unit and widget test cases, minimizing production bugs by 60%.
- Enhanced user experience through UI improvements, increasing user engagement by 30%.

Projects

Assan Khatta (Mobile App) | Flutter, Nest JS, MongoDB

October 2024

github.com/contactAbdullahAamir/Assan-Khatta | assan-khatta.netlify.app

- Developed a cross-platform expense management app using Flutter, streamlining expense tracking between individuals and groups, reducing manual effort by 70%.
- Built a secure backend API with Nest JS and MongoDB, handling over 500 monthly transactions while ensuring data integrity and scalability.
- Achieved 95% accuracy in expense splitting and calculations using a custom algorithm, improving the app's reliability and user trust.
- Integrated a real-time data synchronization feature with MongoDB, enhancing user experience by providing instant updates on shared expenses.

FYP Management App (Desktop Application) | C#, WPF

March 2023

github.com/contactAbdullahAamir/FYP-Manager

- Developed a comprehensive FYP management system using C# and WPF, streamlining the tracking of student projects, group assignments, and faculty allocations.
- Designed a database structure to handle over 200 student projects, ensuring reliable data storage and retrieval.
- Implemented a user-friendly interface with WPF, improving project data accessibility and reducing project setup time by 50%.
- Automated the process of assigning groups to projects and faculty members, reducing manual workload for administrators by 70%.

UET Guide Map (Web Application) | ASP.NET Core

December 2022

github.com/contactAbdullahAamir/UET-Guide-Map

- Developed an interactive campus navigation web app using ASP.NET Core, enabling users to find the shortest path between selected locations on the UET campus.
- Integrated an efficient pathfinding algorithm (Dijkstra's or A*) to calculate the shortest distance, reducing navigation time for users by 60%.
- Designed an intuitive user interface with interactive map features, improving user engagement and enhancing overall user experience.
- Conducted extensive testing to ensure accurate navigation results, achieving a 95% accuracy rate in route suggestions and user satisfaction.

 github.com/contactAbdullahAamir/Bomber-Man

- Developed a classic Bombberman game using C# and .NET Framework, implementing core mechanics like player movement, bomb placement, and explosion effects.
- Designed and optimized game levels with increasing difficulty, enhancing player engagement and retention by 40%.
- Implemented collision detection algorithms and real-time game physics, improving gameplay responsiveness and user experience.
- Utilized object-oriented programming principles to ensure scalable and maintainable code, reducing bug occurrences by 30%.
- Conducted comprehensive testing to achieve a 95% bug-free gameplay experience, resulting in positive user feedback during beta testing.

Technical Skills

Languages: Python, Java, C/C++, C#, TypeScript

Databases: SQL, NoSQL

Technologies/Frameworks: Linux, GitHub, WordPress, Docker, MERN, Flutter

Leadership / Extracurricular

Teaching Assistant

Fall 2023

University of Engineering and Technology, Lahore

- Assisted in teaching Programming Fundamentals to a class of 50+ junior students, helping them understand core programming concepts.
- Conducted weekly lab sessions, providing hands-on coding support and debugging assistance, resulting in a 30% improvement in student lab performance.
- Developed supplemental learning techniques, enhancing student engagement and understanding of programming concepts.
- Provided one-on-one tutoring, helping over 20 students improve their programming skills and achieve higher grades.
