SUMMARY

As a final-year computer science student, I'm all about diving into any task thrown my way. I love following a clear process because it helps me to come up with optimal solutions that can change how we live. I've got a knack for solving tough problems and I'm always eager to learn new things. My goal? To use my computer science skills to create stuff that really makes a difference in the world, while having a blast doing it!

EDUCATION

University of Engineering & Technology, Lahore — [BSCS](#)
